# Using Roshal CarPlay & Android Auto

## 1. Using Roshal CarPlay & Android Auto

- Connect your phone to a car head unit that supports **CarPlay or Android Auto**

- 1** • In CarPlay/Android Auto, **launch the Roshal app** from the home screen
- 2** • You will be shown a **map** of your current location
- 3** • **Tap the map** - the **Tasks icon** will appear at the top left of the screen.
- 4** • Tap the **Tasks icon** to see your **Assignments list** (on-demand orders only).
- 5** • Tap an order to **view its details**. Within details you can:
  - 6** • **Advance the status** of the order as needed (in this case mark enroute).
  - 7** • **Tap Navigate** to get directions to the facility (press **Go** to start)
- To **stop navigation**, tap the screen, then tap the **End** button at the top left.
- **Rinse and Repeat** - tap the screen again to show the **Tasks icon** and start over.

# iOS and Android Voice Commands

Action	iOS (Siri)	Android
Accept an offer	"Hey Siri, Roshal accept order"	(tap mic) "Accept order"
Decline an offer	"Hey Siri, Roshal decline order"	(tap mic) "Decline order"
Mark en route	"Hey Siri, Roshal en route to order"	(tap mic) "En route to order"
Mark arrived	"Hey Siri, Roshal mark order arrived"	(tap mic) "Mark order arrived"
Show orders list	"Hey Siri, Roshal show orders"	(tap mic) "Show orders"
Refresh orders	"Hey Siri, Roshal update orders"	(tap mic) "Update orders"
Start navigation	"Hey Siri, Roshal navigate to order"	(tap mic) "Navigate to order"
Stop navigation	"Hey Siri, Roshal stop navigation"	(tap mic) "Stop navigation"
Call a manager	"Hey Siri, Roshal call dispatch manager" (also: shift / clinic / area)	(tap mic) "Call dispatch manager" (also: shift / clinic / area; "Call client" also supported)

# App Voice Commands

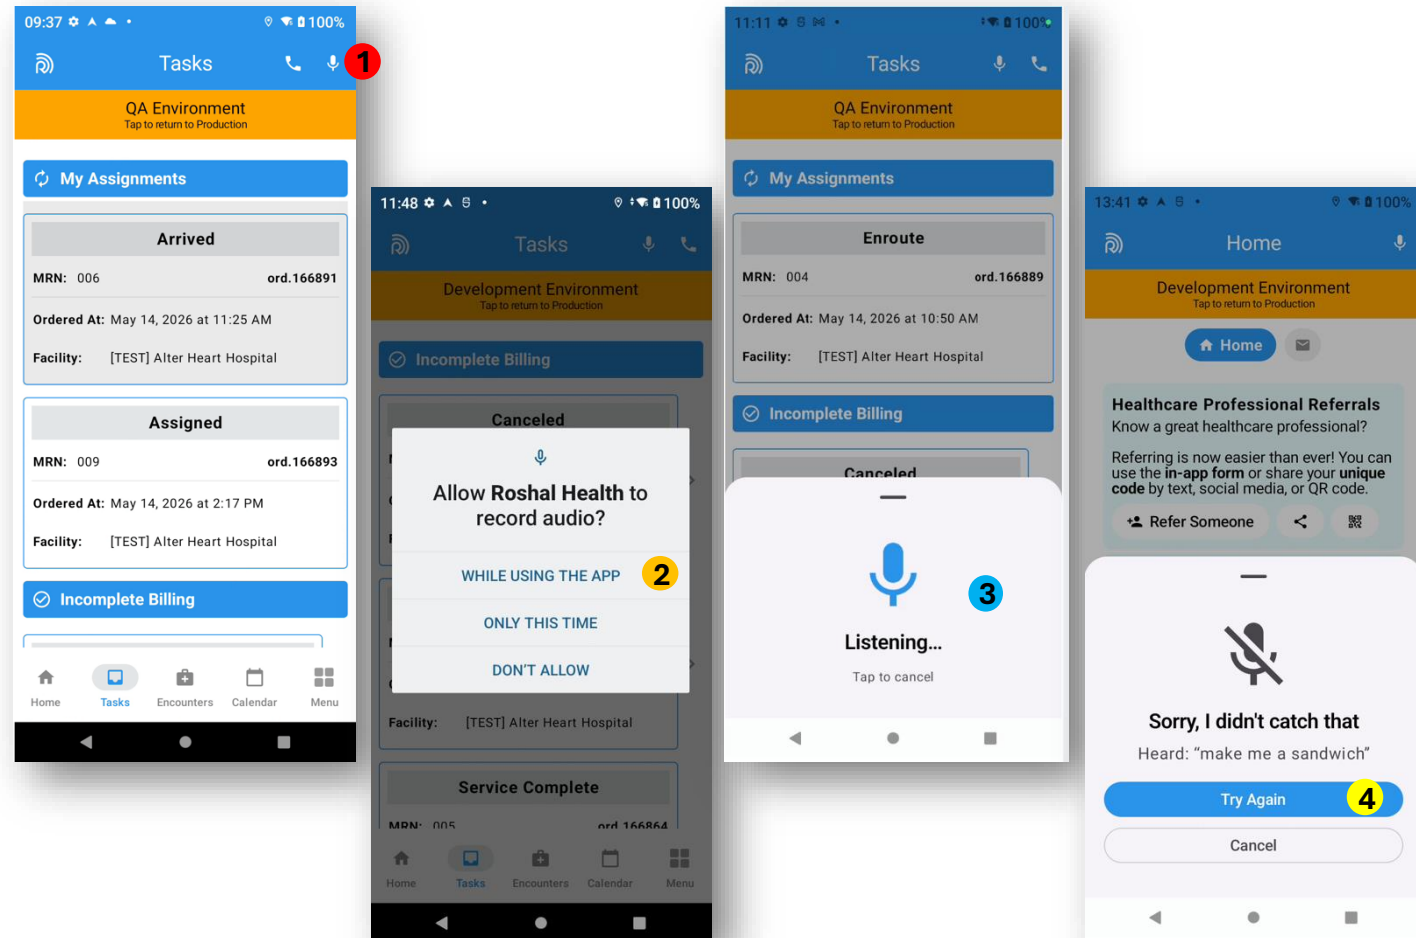

## 2. App Voice Commands

### • Android:

- 1 • To use voice commands on **Android**, tap the **microphone** in the top right corner of your screen
- 2 • Click **While Using the App** to allow voice commands every time you open the app
- 3 • Once this is enabled, every time you click the **microphone** icon, the app will show that it is listening
  - Say any of the previously listed voice **commands** to get started
- 4 • If it doesn't understand a command, it will ask you to click **Try Again**
  - Your screen and order will update automatically upon successful command

### • iOS:

- Similar to Android, but instead of tapping the microphone, say **"Hey Siri"** followed by the one of the previously listed **voice commands**
- To **Enable Siri** open Settings → Apple Intelligence and Siri → Talk & Type to Siri → Select "Siri" or "Hey Siri"
- Check **Settings** → Roshal → **Apple Intelligence and Siri** and make sure everything is enabled.

# Car Voice Commands

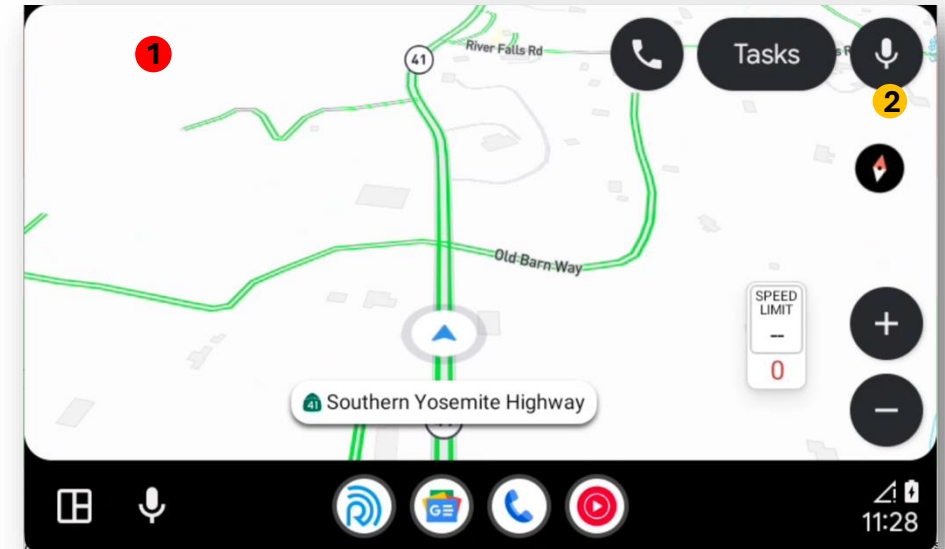

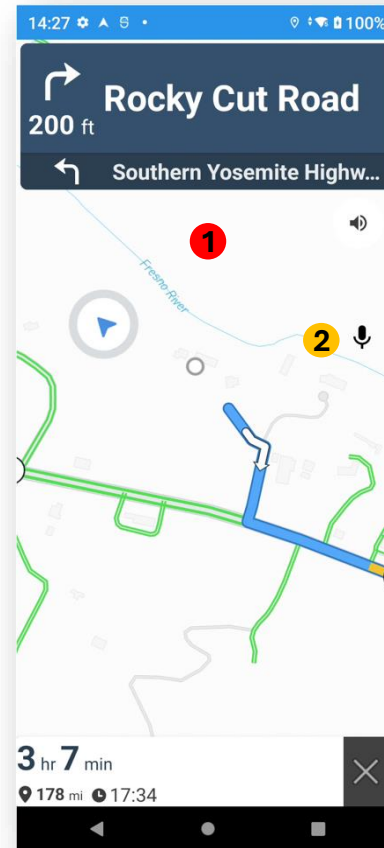

## 3. Car Voice Commands

- **Android:**

- 1 • Once an order is marked **En Route** via the voice commands and the directions have been pulled up, this will auto update your **Android Auto** screen in your car if connected
- Similarly to the mobile app, **Android Auto** allows voice commands
- 2 • Click the **Microphone** icon in the top right corner and say one of the previously listed **voice commands**
  - **Android Auto's** screen along with your order will update automatically upon successful command

- **iOS:**

- Similar to Android, but instead of tapping the microphone, say **“Hey Siri”** followed by the one of the previously listed **voice commands**
  - Your screen and order will update automatically upon successful command
